Copyright Notice	1
Acknowledgement of Receipt by the Delegate	1
Acknowledgements	1
List of Tables	5
List of Figures.....	6
Section 1: Design Guidance for Scaffolds	9
Scaffold checklist.....	9
Scaffold design	9
Scaffold structures that normally require bespoke design	11
1.1 TG20: 21 Standard Scaffolds	12
1.2 TG20: 21 Special Scaffolds	13
1.3 System Scaffolds.....	15
1.4 Scaffold Design Process.....	17
1.5 Design Checks.....	21
Section 2: Codes and Legislation	24
2.1 Codes of Practice.....	24
2.2 NASC Scaffolding Guides	28
2.3 Other Standards	30
2.4 Legislation	31
2.4.1 Who is a 'Designer'?	32
Section 3: Design Methods.....	36
3.1 Permissible Stress Design	36
3.1.1 Load Combinations	36
3.2 Limit State Design.....	37
3.2.1 Load Combinations	38
3.2.2 TG20 Design Method for Scaffolding.....	38
Section 4: Design Terms.....	39
4.1 Axial Force	39
4.2 Bending Moment.....	39
4.3 Shear Force.....	39
4.4 Deflection	39

Section 5: Properties of Scaffolding Components	40
5.1 Structural Properties of Couplers.....	40
5.1.1 Other couplers and fittings.....	42
5.2 Properties of Common Scaffolding Components.....	44
Section 6: Loading	48
6.1 Mass of Materials.....	48
6.2 Imposed loads.....	51
6.2.1 TG20:21 (2.1.2.4) Load Classes.....	51
6.2.2 BS EN 12811-1 Load Classes	51
6.2.3 Dynamic Loading.....	52
6.2.4 Buffeting Loads	53
6.2.5 Loads from Falling Objects	57
6.2.6 Protection Fans.....	57
6.2.7 Edge Protection.....	58
6.2.8 Crowd Loading.....	59
Section 7: Wind.....	62
7.1 BS EN 1991-1-4:2005 + A1:2010 Wind Calculations	64
7.2 Scaffold Sheeting.....	68
7.2.1 Shrink Wrap Sheeting	69
7.3 Advertisement Banners and Hoardings.....	69
Section 8: Snow	72
8.1 BS EN 1991-1-3:2003 Snow Calculations.....	72
Section 9: Water	75
9.1 Forces Produced by Flowing Water.....	75
Section 10: Site Survey	76
10.1 Information required.....	76
Section 11: Design Drawings & Draughting Protocols.....	80
11.1 Draughting Protocols.....	80
11.2 Design information.....	81
Section 12: Design Calculations & Considerations	84
12.1 Scaffolding Components.....	85
12.2 Prefabricated Beams	85
12.2.1 Simply Supported Beams.....	86
12.2.2 Beams with Multiple Supports.....	87

12.3	Standards and Effective Lengths	88
12.3.1	Node point restraint.....	88
12.3.2	The Effective Lengths of Scaffold Tube Members – Fully Braced Scaffold.....	89
12.3.3	The Effective Lengths of Scaffold Tube Members – Typical Independent Scaffolds	91
12.4	Ground Bearing Pressure.....	93
12.4.1	Load consideration	94
12.4.2	Sole Pads & Sole Boards	94
12.4.3	Safe Bearing Performance of the Ground.....	95
12.5	Rigidity and Bracing.....	99
12.5.1	Rigidity.....	99
12.5.2	Bracing Principles for Independent Scaffolds	101
12.6	Stability.....	103
12.6.1	Factors of Safety	104
12.7	Ties and Anchorage	105
12.7.1	TG20 Requirements.....	106
12.7.2	Responsibilities	106
12.7.3	Tie Capacity.....	106
12.7.4	Ties or Anchors to the Building Structure	106
12.7.5	Movable Ties.....	107
12.7.6	Tie Systems	107
12.7.7	Tie Tubes to Standards and Ledgers.....	108
12.7.8	Frequency of Tie Points for Independent Access Scaffolds.....	109
12.7.9	The Loading of Ties.....	110
12.7.10	Specific Requirements for Ringbolts.....	112
12.7.11	TG4:19 Anchorage Systems for Scaffolding	112
12.7.12	Overview of Loading on Ties and the Tie Mechanism	113
12.7.13	Combined Tensile and Shear Loads	114
12.7.14	Testing.....	114
12.8	Tie Patterns for System Scaffolds	118
12.8.1	Cuplok ® [Developed by SGB]	118
12.8.2	Layher Allround	119
12.8.3	‘Genuine’ RMD Kwikstage.....	120
12.8.4	HAKI Universal.....	123
12.8.5	HAKI System Staircases	124

12.8.6	Mixing of System Scaffold Components	125
12.9	Scaffold Tying Check List.....	126
12.10	Examples of Ties and Anchors.....	128
12.10.1	Ringbolts.....	128
12.10.2	Band and Plate Anchors	129
12.10.3	Shear Tie Plate.....	130
12.10.4	Typical Adaptor Brackets for Ring Bolts	131
12.10.5	Self-tapping Screw Bolts	132
	Further reading	135

List of Tables

Table 1:	TG20 Compliant Scaffolds.....	12
Table 2:	TG20 Standard Scaffolds.....	13
Table 3:	TG20 Special Scaffolds.....	13
Table 4:	NASC Compliant System Scaffold Suppliers	16
Table 5:	NASC Compliant System Scaffolds.....	17
Table 6:	Temporary Works Design Category Checks as per BS5975.....	21
Table 7:	Common Codes of Practice in Scaffold Design.....	25
Table 8:	NASC Technical Guides Useful for Scaffold Design.....	29
Table 9:	NASC Safety Guides Useful for Scaffold Design.....	29
Table 10:	Other Standards Useful in Scaffold Design	30
Table 11:	Legislation Useful for Scaffold Design.....	32
Table 12:	BS EN 12811-1:2003 Table C.1 – Characteristic values of resistance for couplers.....	37
Table 13:	Working load design parameters for scaffold couplers on steel and aluminium tubes.....	42
Table 14:	Safe Working Loads for SGB Gravlock Girder Clamps	42
Table 15:	Section Properties for Scaffolding Components.....	45
Table 16:	Scaffold Component Weights – TG20:21 Design Guide Table 5.1	48
Table 17:	Mass of men and materials - TG20:21 (5.2.2) Design Guide Table 5.3	49
Table 18:	Other weights and masses.....	50
Table 19:	Imperial-Metric Conversion Table.....	50

Table 20: Load Classes as per TG20:21	51
Table 21: Load Classes as per BS EN 12811-1 (Table 3).....	51
Table 22: Additional loading due to Mechanical and Manual lifting	52
Table 23: Vertical loading induced by horizontal movement	52
Table 24: C_f values for wind normal to cladding as per BS EN 12811 (A.2.1) & TG20:21 DG (5.15.1.2)	62
Table 25: Common Cladding Types encountered in Scaffold Design.....	68
Table 26: BS 5975:2019, Table 18 Presumed allowable bearing pressure under vertical static loading	96
Table 27: Excalibur Screwbolt Data for C30/35 Concrete - 1	132
Table 28: Excalibur Screwbolt Data for C30/35 Concrete - 2	133
Table 29: Excalibur Screwbolt Data for C30/35 Concrete - 3	133
Table 30: Major UK bolt suppliers.....	134

List of Figures

Figure 1: Extract from TG20:21 eGuide	12
Figure 2: System Scaffold Examples	15
Figure 3: Design Process Flowchart - Stage 1	18
Figure 4: Design Process Flowchart - Network Rail.....	19
Figure 5: Design Process Flowchart – Stage 2.....	20
Figure 6: The loads applied to a double coupler.....	40
Figure 7: Aerodynamic pressures on overbridges.- Ref. GC/GN5612.....	53
Figure 8: Simple vertical surfaces parallel to the track (e.g. noise barriers).....	54
Figure 9: Actions on Simple Horizontal Surfaces above the track as per BS EN 1991-2:2003.....	55
Figure 10: Edge protection minimum requirements as per TG20:21 & BS EN 12811-1:2003.....	58
Figure 11: 48.3 Design Calculations for Fully Encapsulated Beamed Access Scaffold	64
Figure 12: Flowchart for obtaining q_p for sites within the UK.....	65
Figure 13: NA to BS EN 1991-1-4, Figure NA.1 Value of fundamental basic wind velocity $v_{b,map}$ (m/s) before the altitude correction is applied.....	66
Figure 14: Flowchart for obtaining F_w for sites within the UK.....	67

Figure 15: Flowchart for determining snow loading onto roofs.	73
Figure 16: NA to BS EN 1991-3:2003, Figure NA.1 – Characteristic ground snow load map.....	74
Figure 17: 48.3 Site Survey Checklist.....	79
